B I O N E T

This is our standard product. Why standard? Because it keeps all our standard guaranteed properties.

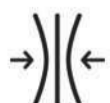

Bionet is designed mainly for lighter crops like silage & hay – green net for green material. It fits well to all balers. With Bionet you will minimize net waste in baling process and maximize efficiency. We give you long rolls up to 4500 m – so you won't have to change it too often disturbing your work on the field. Our whole range of products keeps top UV protection standards and works perfectly in most of the climates.
